[Gypsy Gameschooler](#) has been a labor of love for me, but website hosting gets expensive. I would really appreciate it if you were to click one of my Amazon Affiliate links before doing your shopping on Amazon.

Amazon Affiliate links don't cost you anything, but Amazon pays me a small commission. The cookies are only good for 24 hours, but I get credit no matter your purchase.

I'm an affiliate for a few other programs. Every penny helps! One day, I hope to help support my family with my blog, so thank you!

If you want to share this printable with someone else - thank you! Please just send them to my website so they can purchase it for themselves. Thanks again!

A 10x10 grid of squares. Each cell in the grid contains a small square in its top-left corner. The small squares are arranged in a repeating pattern: they are present in the top-left corner of every other cell, starting from the top-left cell (0,0). Specifically, small squares are located in cells where both the row and column indices are even (assuming 0-indexing from the top-left). This creates a checkerboard-like pattern of small squares within the larger grid.
